PCI Acknowledgement Form

As of December 31, 2007, Visa-Approved PIN Entry Devices are no longer approved for new deployments by PCI Security Standards Council. Card association rules now mandate that all PIN Entry Devices purchased for new deployments must meet the more strict PCI PIN Entry Device requirements.

POS Portal currently offers a number of PCI-Approved PIN Entry Devices that cover most payment environments and all communications methods. These products are typically direct replacements of their NON-Approved and Visa-Approved PIN Entry Device counterparts.

POS Portal customers may have the need to continue purchase of NON-Approved and Visa-Approved configurations. Effective immediately, purchase of NON-Approved and Visa-Approved PIN Entry Devices from POS Portal will be performed following the execution of this incorporated notice and waiver.

You acknowledge by signing below that POS Portal will not be liable to you or any other party for any direct or indirect loss, damages or costs arising out of POS Portal providing you with the NON-Approved or Visa-Approved PIN Entry Device which you have requested. In addition, you will indemnify POS Portal from any loss, damage or costs which arise out of any third-party's claim relating to POS Portal's provision of NON-Approved and Visa-Approved PIN Entry Devices as specified by the PCI Security Standards Council.
